Mazar-e-Sharif, Afghanistan

Professional Summary

Full Stack Developer specializing in Laravel and React with experience building business management systems, RESTful APIs, and database-driven web applications. Experienced in designing scalable solutions including management platforms, dashboards, and workflow-based applications. Skilled in backend architecture, frontend development, database design, and modern web technologies. Familiar with AI and computer vision concepts through academic research and university projects.

Technical Skills

Frontend

React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI, Vite

Backend

PHP, Laravel, RESTful APIs, Authentication & Authorization, API Development, Backend Architecture

Database

MySQL, SQLite, SQL, Database Design, Database Optimization

Mobile & Desktop

Flutter, Electron, Tauri (Basic)

DevOps & Tools

Git, GitHub, Docker, Linux, CI/CD, Deployment, VPS, cPanel, Hostinger

Other Technologies

Python, Object-Oriented Programming, Data Structures & Algorithms, Machine Learning Fundamentals, Computer Vision

Professional Experience

Freelance Full Stack Developer

2025 – Present

- Develop custom web applications using Laravel, React, TypeScript, and MySQL.
- Build RESTful APIs, database-driven applications, and scalable backend solutions.
- Develop business management systems including dashboards, workflow platforms, and enterprise applications.
- Collaborate with clients to analyze requirements, design solutions, and deliver complete software products.
- Manage development lifecycle including planning, implementation, testing, and deployment.

Founder & Full Stack Developer — AISTWORKS

2025 – Present

- Founded and managed a software development brand focused on web applications and digital solutions.
- Designed and developed full-stack applications using Laravel, React, and modern web technologies.
- Built solutions for business management, e-commerce, workflow automation, and custom software requirements.
- Managed project planning, development, deployment, and client communication.

Full Stack Developer — Sky Soft

2025

- Worked as a full-time developer and continued remote collaboration on software projects.
- Developed web applications using Laravel, PHP, JavaScript, and MySQL.
- Implemented backend features, database structures, and frontend components.
- Participated in debugging, optimization, and application improvements.

Part-time Backend Developer — PAYDA YSH ZAMAN COMPANY

2023 – 2024

- Developed backend features for data-driven web applications.
- Designed and implemented RESTful APIs and database solutions.
- Worked with frontend components to integrate backend services.

- Improved application performance through code optimization and database improvements.

Featured Projects

Fuel Station Management System

Laravel | React | MySQL | REST API

- Designed and developed a business management system for fuel station operations.
- Built backend services, database architecture, and administrative dashboard workflows.
- Implemented user management, fuel station management, wallet tracking, transaction records, and reporting features.

Construction Management System

Laravel 12 | React | TypeScript | MySQL

- Developed a full-stack construction management platform for project and operational management.
- Implemented modules for clients, contractors, materials, purchases, expenses, and financial tracking.
- Built RESTful APIs and responsive dashboard interfaces.

Multi-Tenant Sarafi Management System

Laravel API | Flutter | MySQL | Redis

- Designed a multi-tenant exchange management platform with independent exchange environments.
- Implemented customer wallets, transaction workflows, approval processes, and ledger-based accounting concepts.
- Designed role-based access control and audit logging architecture.

Gold Shop Management System

Laravel | React | Material UI | Electron

- Developed a desktop-based management system for gold shop operations.
- Implemented inventory management, sales, purchases, and accounting workflows.
- Built modern interfaces using React and Material UI.

MRN Market — E-commerce Platform

Laravel | React | MySQL

- Developed an e-commerce platform with product management and customer workflows.
- Implemented backend APIs, database models, and administrative features.

Education

Bachelor of Computer Engineering

Imam Khomeini International University (Qazvin), Iran
2021 – 2025

Relevant Coursework:

Data Structures & Algorithms, Database Systems, Computer Networks, Artificial Intelligence, Web Technologies, Software Engineering

Certifications & Professional Development

AWS Foundation: Machine Learning Basics

Amazon Web Services (AWS) | 2024

Amazon RDS for SQL Server – Getting Started

Amazon Web Services (AWS) | 2024

Machine Learning with Python

freeCodeCamp | 2024

Data Analysis with Python

freeCodeCamp | 2024

Computer Vision

Kaggle | 2024

Python

Kaggle | 2024

Languages

Persian (Dari) — Native

English — Professional Working Proficiency

Uzbek — Fluent

Pashto , Urdu , Hindi — Conversational
